

Sullivan Custom Handmade Guitars

Palo Escrito Guitar – SMSA-E

This SMSA-E features a tightly grained Engelmann Spruce top with a beautifully figured set of Palo Escrito back and sides. The guitar has curly Koa bindings with purple, orange, and black purfling lines top and back with mitered side lines and curly Koa end wedge, heel cap and headstock laminate. The top features abalone purflings, a stunning spalted maple rosette with an abalone center and colored lines. Water buffalo horn bridge pins, saddle, and nut add another unique aesthetic to this one of a kind handmade guitar. Gold Gotoh open geared scallop button tuners complete the beauty of this guitar with a touch of vintage flare. For electronics we're installing a new design from L.R.Baggs called the [Anthem System](#). It's a dual source system that features an under saddle pickup and the latest technology in a internally mounted condenser microphone. This guitar is a real eye catcher with lots of volume and a great tone.
